

Wednesday 27th January 2021

Watch the Video Tutorial carefully first. It will pause half way through to allow you to complete the first 3-4 questions of the worksheet. I would strongly suggest you do this before viewing the rest of the video and attempting the more challenging questions.

The worksheet is designed to progressively challenge all levels of confidence in a given topic. As such, please do not think that you have to complete all of it. Spend about between 20 and 30 minutes on it (in addition to the video) which should allow you to find a suitable level of challenge.

Please do not feel you must print the worksheet if you are unable. Just record your workings and answers in your exercise book.

Remember a teacher is available on Microsoft Teams to support you to if you need help.

Lesson 3: Add lengths
